

SECTION 1

THE COURIER-JOURNAL, LOUISVILLE, KY., SATURDAY MORNING, JANUARY 9, 1960

1959: Triumphs In Exploration

WASHINGTON—In 1959, a year of dazzling scientific progress, man caught his first glimpse of the moon, hidden face of the moon.

On October, astronauts could only gaze across the moon covered by the same hemisphere always turned toward the earth. Then came the dramatic flight of Soviet rocket Luna III, which transmitted photographs of the moon's white side to earth. Through its pictures were the first direct evidence of the detail for human attention to begin to map the moon's features.

The Russian triumph over the moon was only one of many important discoveries of 1959 during the year in man's unending quest for more knowledge.

At his own humble post, it was the 100th anniversary of the death of Charles Darwin's "Origin of Species." Trifling during the centennial year, a group of scientists gathered in Rome to discuss the theory of evolution. They were not only interested in the theory but also in the practical application of it. In Italy, a group of scientists gathered to discuss the theory of evolution. They were not only interested in the theory but also in the practical application of it.

Down 18,000 Feet

In the sea, as well as in the sky and on land, scientists looked for new frontiers. In the sea, as well as in the sky and on land, scientists looked for new frontiers. In the sea, as well as in the sky and on land, scientists looked for new frontiers.

A Rowing Problem

During Norway's 150th anniversary, a group of scientists gathered to discuss the theory of evolution. They were not only interested in the theory but also in the practical application of it.

To Your Good Health Youngsters Should Get A Quart Of Milk A Day

By JOSEPH G. MOYNER, M.D.

"You see, I have a 4-year-old, who needs about two quarts of milk a day, in the past he had a nutritional 'crisis'."

It is interesting that this letter comes from a father. Usually, it is the mother who writes about such things. But I'm sure that the mother who writes about the physical welfare of her children.

Now for the specific question. The question is: How much milk should a child get? The answer is: A quart a day.

Portrait of a man, likely related to the 'On Dining In Rome' article.

STAN BELAPLANE'S Travel Tips . . .

On Dining In Rome And British Pubs

"... some restaurants in Rome are better than others. You'll find that the food is more likely to be good than in a British pub. In Rome, you'll find that the food is more likely to be good than in a British pub. In Rome, you'll find that the food is more likely to be good than in a British pub."

NOTES ON THE NEWS

The I.C.G. scientists could point to many striking achievements. The discovery of a new element, the discovery of a new element, the discovery of a new element.

DAVID LAWRENCE Sings

Ike Warns Against Reds' Pleasant Promises

WASHINGTON—Looked at from an international standpoint, the most striking thing about President Eisenhower's address to Congress is the expression of a confident distrust of the Soviet Union.

The Neighbors

By George Clark

"Darling, you've not even listening to my plan to become mayor my business and make you a vice-president."

Why The Surplus?

The trend, however, is likely to be stationary. Prices of raw materials are expected to rise after the first two months of the year.

enjoy the true old-style Kentucky Bourbon

always smoother because it's slow-distilled... You'll find a smoothness and character in Early Times that makes your choice richly rewarding. It's the extra care and attention of slow-distilling... that gives Early Times its full, gratifying flavor. Making whisky this old-style way costs more, but we think you'll agree it's worth it.
